Papermark

Secure and modern document sharing infrastructure

Document sharing and Data Room software of 2026 is outdated!

This is why we are building Papermark. Modern. Secure. Open Source.

60+

Developers and contributors who help building Papermark.

Previously founder of Hackerbay, backed by NFX. Ex. Fund of Funds, ex. Intel. Open Source enthusiast.

**Marc Seitz**

Co-Founder of Papermark

Second time founder, PhD in technology. Self-taught developer focused on growth and marketing.

Iuliia Shnai

Co-Founder of Papermark

Papermark
turns your files
into shareable
links and give
insights into
each page of
your document

Our priority is your document security

As an open source and self-hosted solution first, we know that the key to the deal's success is absolute control over your data.

AICPA SOC 2 · HIPAA · GDPR · CCPA COMPLIANT

MADE IN GERMANY · 38+ data centers

SOC 2 Compliant

Service Organization Control compliance (in progress) with commitment to full security

GDPR & CCPA Compliant

Full compliance with the European General Data Protection Regulation and California Consumer Privacy Act

Global Data Centers

EU, US, UAE. Choose where your data resides with our flexible data center options.
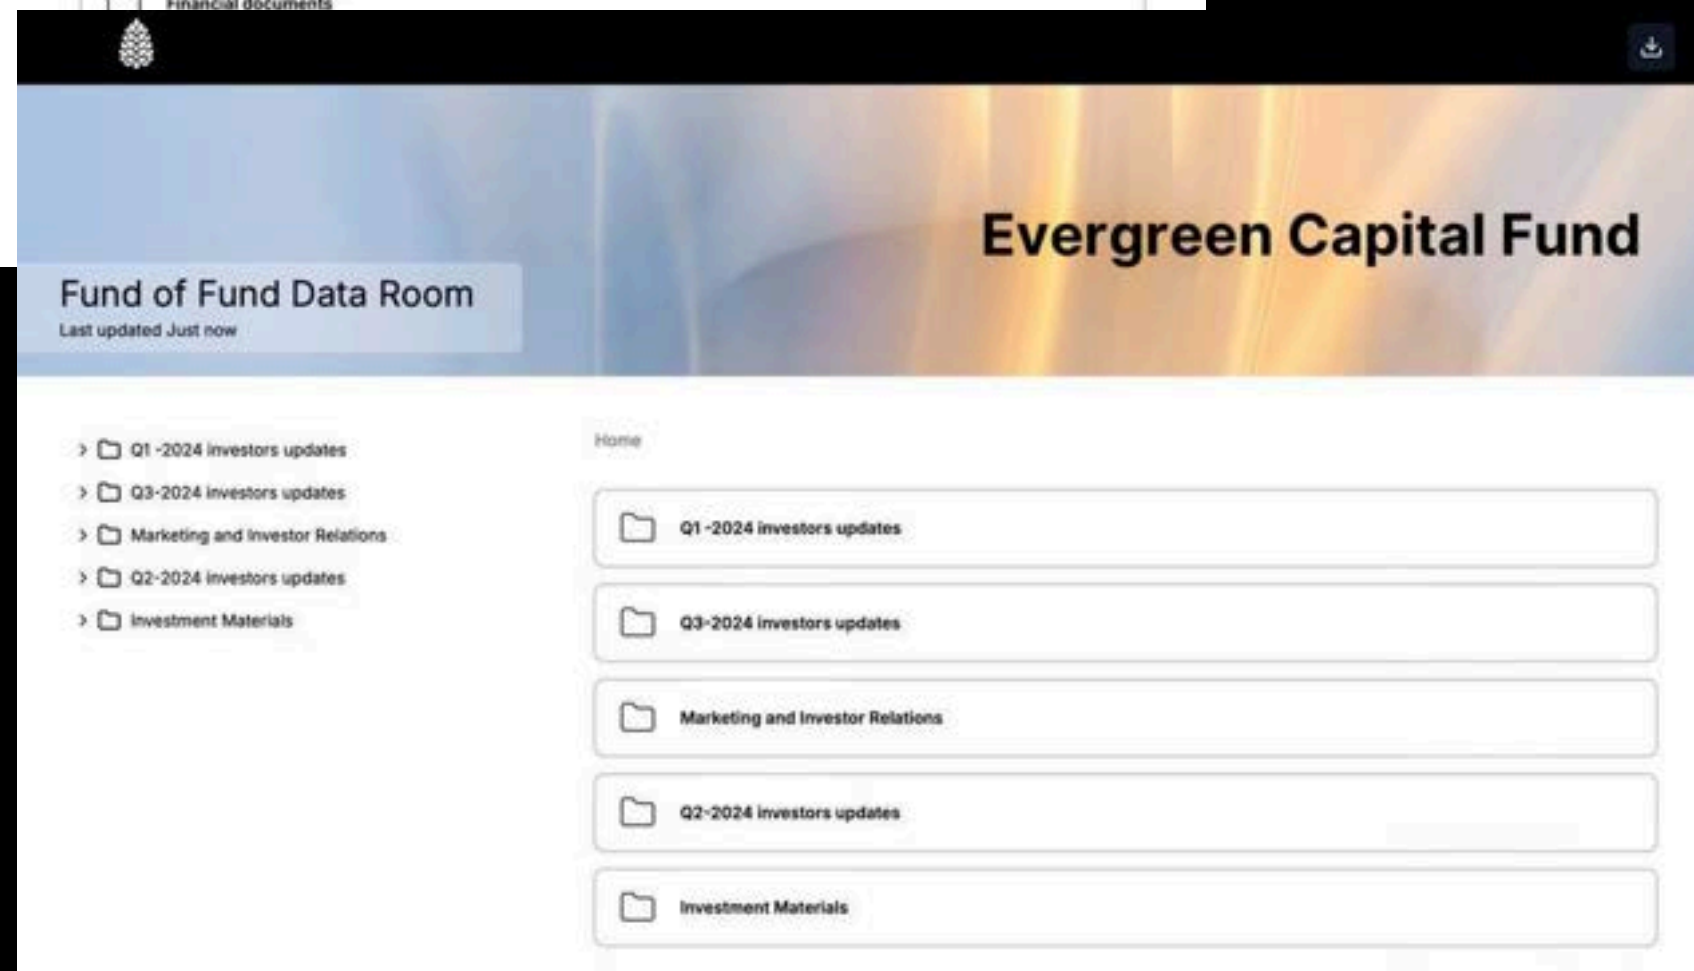

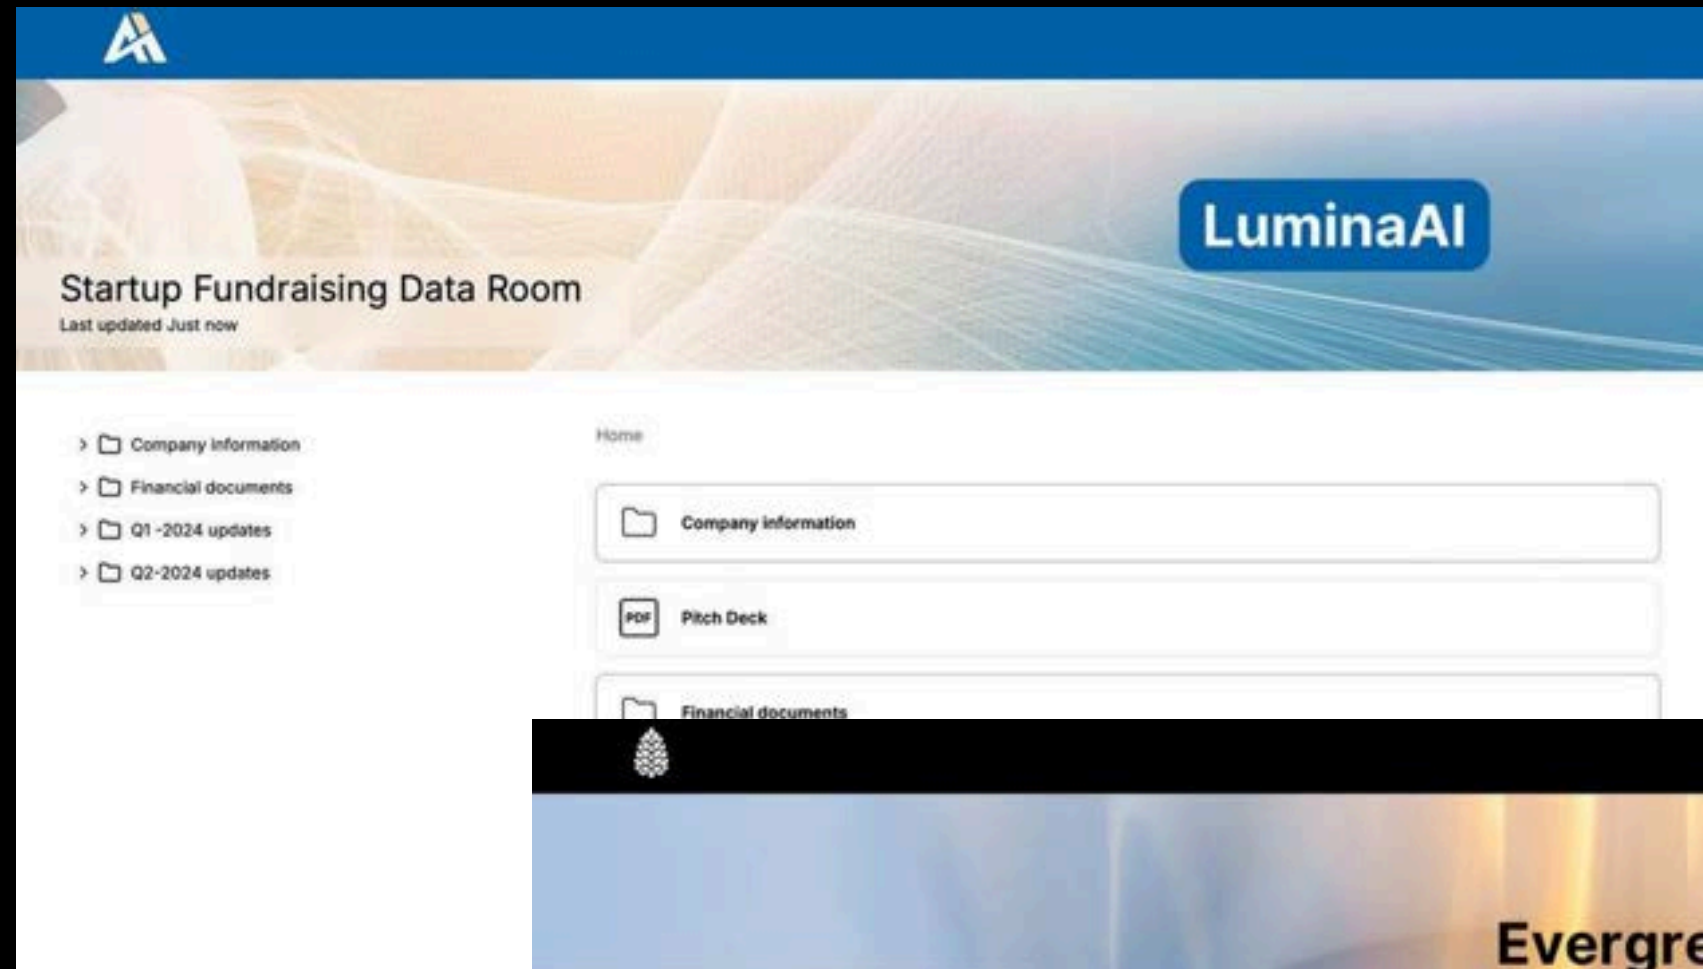

Military-grade Encryption

All data is secured with AES-256 encryption, the same standard used by governments and military.

HIPAA Compliant

Healthcare industry specific compliance

2FA & SSO

Advanced user security authentification

Securely share branded
data rooms and
documents, set
access rights
and collaborate
inside.

$1B

in transaction value processed
via Papermark data rooms

read all customer stories on papermark.com/customers

White-label

It means that you can have fully customizable platform by hosting us.

500+

Product updates and quality improvement based on customer requests were made in 2025

Papermark can be used as SaaS and also can be self-hosted using our enterprise license

10x more secure

Papermark is more secure, as a source code is public and transparent. Plus we are SOC2 and GDPR compliant.

Ted Spare
@TedSpare

We self-host Papermark at Rubric Labs for doc-sharing. Brilliantly-simple alternative to Docsend. Features are well-executed, so I can't wait to try new stuff!

Papermark team listens to their users. Thanks for solving a big pain point. DocSend monopoly will end soon!

Jaski
Founder, Townhall Network

Love that Papermark is an Open Source! Very glad we switched and using it for our data rooms.

Kim
Investor Relations, Fabric VC

I am using Papermark daily sharing documents to LPs and viewing the pitch decks from founders.

Dominik
Partner at VC Fund

Thank You!
